

Electric Screwdriver and Controller with Bolt Counter and PLC connectivity

Customer: Seat Manufacturer in India

Tool Used:

SKD-BC830P with
Controller SKD-BC40HL

Benefits to Customer:

After using pneumatic screwdriver for a long time customer realized that for some of the threaded tightening applications, there was a need of higher level of security in the tightening. The solution was found in the use of the Kilews Screwdriver with Pokayoke Controller that also gave signal to PLC of OK or NG.

Conclusions:

- No operators influence
- Zero Fault Production
